INDEX TO AUTHORS

A

Abrams, Richard, Hammarsten, Einar, and **Shemin, David.** Glycine as a precursor of purines in yeast, 429

Altschul, Aaron M. See *Coppedge, Segaloff, Sarett, and Altschul,* 431

Anfinsen, Christian B. See *Pope and Anfinsen,* 305

Armstrong, Marvin D., and **du Vigneaud, Vincent.** Mercaptals and mercaptoles of cysteine, 749

B

Baer, Harold. The inhibition of pyruvic oxidase by protoanemonin, 211

Balls, A. K., Walden, M. K., and **Thompson, R. R.** A crystalline β-amylase from sweet potatoes, 9

Barker, H. A., Volcani, B. E., and **Cardon, B. P.** Tracer experiments on the mechanism of glycine fermentation by *Diplococcus glycinophilus,* 803

—. See *Putman, Hassid, Krotkov, and Barker,* 785

Barker, S. B. Determination of protein-bound iodine, 715

Baumberger, J. Percy. See *Fales and Baumberger,* 1

Beyer, G. Thannhauser. See *Dounce and Beyer,* 159

Binkley, Francis. A colorimetric reaction of chloride ion, 403

— and **Nakamura, Kay.** Metabolism of glutathione. I. Hydolysis by tissues of the rat, 411

—. See *Nakamura and Binkley,* 407

Bloch, Konrad, and **Kramer, W.** The effect of pyruvate and insulin on fatty acid synthesis *in vitro,* 811

Bond, Howard W. See *Hundley and Bond,* 513

Borsook, Henry, Deasy, Clara L., Haagen-Smit, A. J., Keighley, Geoffrey, and **Lowy, Peter H.** α-Aminoadipic acid: a product of lysine metabolism, 423

—. See *Dubnoff and Borsook,* 425

Broomell, Hannah T. See *Kety, Harmel, Broomell, and Rhode,* 487

Broquist Harry P., and **Snell, Esmond E.** On the interaction of avidin and oleic acid, 435

Brown, George Bosworth. See *Tinker and Brown,* 585

Brown, Kenneth D., Shupe, Robert E., and **Laskowski, M.** Crystalline activated protein B (chymotrypsin B), 99

Brunetti, R. See *Fishman, Springer, and Brunetti,* 449

Bryan, Carl E. See *Skipper, Bryan, White, and Hutchison,* 371

Buchanan, John M., Sonne, John C., and **Delluva, Adelaide M.** Biological precursors of uric acid. II. The rôle of lactate, glycine, and carbon dioxide as precursors of the carbon chain and nitrogen atom 7 of uric acid, 81

—. See *Sonne, Buchanan, and Delluva,* 69

C

Camien, Merrill N., and **Dunn, Max S.** A composite basal medium for the microbiological assay of leucine, 137

Cantarow, A. See *Pearlman, Rakoff, Paschkis, Cantarow, and Walkling,* 175

Cardon, B. P. See *Barker, Volcani, and Cardon,* 803

Carlson, A. B. See *Neuman, Fleming, Carlson, and Glover,* 41

—. See *Neuman, Fleming, Dounce, Carlson, O'Leary, and Mulryan,* 737

Chargaff, Erwin. Studies on the mechanism of the thromboplastic effect, 253

— and **Green, Charlotte.** On the inhibition of the thromboplastic effect, 263

— and **Zamenhof, Stephen.** The isolation of highly polymerized desoxypentosenucleic acid from yeast cells, 327

Clark, Dale A., and **Dittmer, Karl.** The inhibition of microbial growth by β-2-furylalanine, 313
Cooperstein, S. J. See *Wainio, Cooperstein, Kollen, and Eichel,* 145
Coppedge, Richard L., Segaloff, Albert, Sarett, Herbert P., and **Altschul, Aaron M.** Cozymase as a part of the hepatic estrogen-inactivating system, 431
Cori, Carl F. See *Cori, Slein, and Cori,* 605
—. See *Taylor, Velick, Cori, Cori, and Slein,* 619
Cori, Gerty T., Slein, Milton W., and **Cori, Carl F.** Crystalline D-glyceraldehyde-3-phosphate dehydrogenase from rabbit muscle, 605
—. See *Taylor, Green, and Cori,* 591
—. See *Taylor, Velick, Cori, Cori, and Slein,* 619
Cravens, W. W. See *Robblee, Nichol, Cravens, Elvehjem, and Halpin,* 117
Cristol, Stanley J. See *Dittmer, Herz, and Cristol,* 323

D

Daniel, Louise J., Scott, M. L., Norris, L. C., and **Heuser, G. F.** The effect of synthetic pterins on growth and hemoglobin formation in the chick, 123
Deasy, Clara L. See *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy,* 423
Dekker, Charles A., and **Fruton, Joseph S.**. Preparation of D- and L-methionine from DL-methionine by enzymatic resolution, 471
Delluva, Adelaide M. See *Buchanan, Sonne, and Delluva,* 81
—. See *Sonne, Buchanan, and Delluva,* 69
Dittmer, Karl, Herz, Werner, and **Cristol, Stanley J.** The synthesis and microbiological properties of two isomeric naphthylalanines, 323
—. See *Clark and Dittmer,* 313
Dorfman, Albert. See *McElroy and Dorfman,* 805
Dounce, Alexander L., and **Beyer, G. Thannhauser.** A new method for the determination of the enzyme aldolase, 159
—. See *Neuman, Fleming, Dounce, Carlson, O'Leary, and Mulryan,* 737
Downs, Clarence E. See *Hunter and Downs,* 31
Driscoll, P. Elizabeth. See *Fruton, Smith, and Driscoll,* 457
Dubnoff, Jacob W., and **Borsook, Henry.** α-Aminoadipic acid in arginine formation, 425
Dunn, Max S. See *Camien and Dunn,* 137

E

Ehrlich, Gabriele, Taylor, Harriett E., and **Waelsch, Heinrich.** The effect of surface-active substances on the fuchsin reaction of higher fatty aldehydes, 547
Eichel, B. See *Wainio, Cooperstein, Kollen, and Eichel,* 145
Elvehjem, C. A. See *Robblee, Nichol, Cravens, Elvehjem, and Halpin,* 117
Engel, Lewis L. See *Mattox, Turner, McKenzie, Engel, and Kendall,* 283
—. See *McKenzie Mattox, Engel, and Kendall,* 271
Engstrom, William W. See *Hoberman, Sims, and Engstrom,* 111

F

Fairbairn, Donald. The preparation and properties of a lysophospholipase from *Penicillium notatum,* 705
Fales, Frank W., and **Baumberger, J. Percy.** The anaerobic assimilation of glucose by yeast cells, 1
Fishman, William H., Springer, B., and **Brunetti, R.** Application of an improved glucuronidase assay method to the study of human blood β-glucuronidase, 449
Fleming, R. W. See *Neuman, Fleming, Carlson, and Glover,* 41
—. See *Neuman, Fleming, Dounce, Carlson, O'Leary, and Mulryan,* 737

Friedberg, Felix, Schulman, Martin P., and **Greenberg, David M.** The effect of growth on the incorporation of glycine labeled with radioactive carbon into the protein of liver homogenates, 437

—, **Tarver, Harold,** and **Greenberg, David M.** The distribution pattern of sulfur-labeled methionine in the protein and the free amino acid fraction of tissues after intravenous administration, 355

—. See *Winnick, Friedberg, and Greenberg,* 189

Fruton, Joseph S. Specificity of chymotrypsin B, 109

—, **Smith, Virginia A.,** and **Driscoll, P. Elizabeth.** On the proteolytic enzymes of animal tissues. VII. A peptidase of calf thymus, 457

—. See *Dekker and Fruton,* 471

—. See *Krehl and Fruton,* 479

G

Glover, N. See *Neuman, Fleming, Carlson, and Glover,* 41

Green, Arda Alden. See *Taylor, Green, and Cori,* 591

Green, Charlotte. See *Chargaff and Green,* 263

Greenberg, David M., and **Winnick, Theodore.** Studies in protein metabolism with compounds labeled with radioactive carbon. II. The metabolism of glycine in the rat, 199

—. See *Friedberg, Schulman, and Greenberg,* 437

—. See *Friedberg, Tarver, and Greenberg,* 355

—. See *Winnick, Friedberg, and Greenberg,* 189

Greenstein, Jesse P. See *Price and Greenstein,* 337

Grossowicz, N. Glutamine, an antimetabolite for *Staphylococcus aureus,* 729

H

Haagen-Smit, A. J. See *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy,* 423

Halpin, J. G. See *Robblee, Nichol, Cravens, Elvehjem, and Halpin,* 117

Hammarsten, Einar. See *Abrams, Hammarsten, and Shemin,* 429

Handler, Philip. The influence of thyroid activity on the liver and plasma lipides of choline- and cystine-deficient rats, 295

Harmel, Merel H. See *Kety, Harmel, Broomell, and Rhode,* 487

Hassid, W. Z. See *Putman, Hassid, Krotkov, and Barker,* 785

Herz, Werner. See *Dittmer, Herz, and Cristol,* 323

Heuser, G. F. See *Daniel, Scott, Norris, and Heuser,* 123

Hoberman, Henry D., Sims, Ethan A. H., and **Engstrom, William W.** The effect of methyltestosterone on the rate of synthesis of creatine, 111

Holland, Bryant R. See *Meinke and Holland,* 535

Hundley, James M., and **Bond, Howard W.** A study of the conversion of isotopic nicotinic acid to N^1-methylnicotinamide, 513

Hunter, Andrew, and **Downs, Clarence E.** Inactivation of arginase by protein denaturants, 31

Hutchison, Olivia S. See *Skipper, Bryan, White, and Hutchison,* 371

J

Jager, B. V., and **Nickerson, Margaret.** A simple quantitative chemical method for estimating γ-globulin in human serum, 683

K

Kaplan, Deborah. See *Koch and Kaplan,* 363

Kazenko, Anna, and **Laskowski, M.** On the specificity of chicken pancreas conjugase (γ-glutamic acid carboxypeptidase), 217

Keighley, Geoffrey. See *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy,* 423

Kendall, Edward C. See *Mattox, Turner, McKenzie, Engel, and Kendall,* 283

Kendall, Edward C. See *McKenzie, Mattox, Engel, and Kendall,* 271

Kennedy, Eugene P. See *Lehninger and Kennedy,* 753

Kety, Seymour S., Harmel, Merel H., Broomell, Hannah T., and **Rhode, Clara Belle.** The solubility of nitrous oxide in blood and brain, 487

Klotz, Irving M., and **Urquhart, Jean M.** The combination of adenine, adenosine, and adenylic acid with serum albumin, 21

Koch, Walter, and **Kaplan, Deborah.** A simultaneous Carr-Price reaction for the determination of vitamin A, 363

Kollen, S. See *Wainio, Cooperstein, Kollen, and Eichel,* 145

Kramer, W. See *Bloch and Kramer,* 811

Krehl, Willard A., and **Fruton, Joseph S.** The utilization of peptides by lactic acid bacteria, 479

Krimsky, I. See *Racker and Krimsky,* 519

Krotkov, G. See *Putman, Hassid, Krotkov, and Barker,* 785

Krueger, Keatha K., and **Peterson, W. H.** Microbiological evidence for the identity of α- and β-biotin, 497

L

Laskowski, M. See *Brown, Shupe, and Laskowski,* 99

—. See *Kazenko and Laskowski,* 217

Lehninger, Albert L., and **Kennedy, Eugene P.** The requirements of the fatty acid oxidase complex of rat liver, 753

— and **Smith, Sylvia Wagner.** Rapid determination of *n*-octanoic acid, 773

LePage, G. A. See *Novikoff, Potter, and LePage,* 239

Lewis, Howard B. See *Venkataraman, Venkataraman, and Lewis,* 641

Lieberman, S. V. Simplified calculations of theoretical distributions and partition coefficients for counter-current extractions, 63

Lipmann, Fritz. See *Loomis and Lipmann,* 807

London, Irving M., Shemin, David, and **Rittenberg, D.** The *in vitro* synthesis of heme in the human red blood cell of sickle cell anemia, 797

—. See *Shemin, London, and Rittenberg,* 799

Loomis, W. F., and **Lipmann, Fritz.** Reversible inhibition of the coupling between phosphorylation and oxidation, 807

Lowry, Oliver H. A micro photofluorometer, 677

Lowy, Peter H. See *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy,* 423

M

Mattox, Vernon R., Turner, Richard B., McKenzie, Bernard F., Engel, Lewis L., and **Kendall, Edward C.** Steroids derived from bile acids. VII. The probable stereochemical configuration of some derivatives of the bile acids, 283

—. See *McKenzie, Mattox, Engel, and Kendall,* 271

McConnell, Kenneth P. Passage of selenium through the mammary glands of the white rat and the distribution of selenium in the milk proteins after subcutaneous injection of sodium selenate, 653

McElroy, O. E., and **Dorfman, Albert.** The rôle of pantothenic acid in the metabolism of pyruvate by *Proteus morganii,* 805

McKenzie, Bernard F., Mattox, Vernon R., Engel, Lewis L., and **Kendall, Edward C.** Steroids derived from bile acids. VI. An improved synthesis of methyl 3,9-epoxy-Δ^{11}-cholenate from desoxycholic acid, 271

—. See *Mattox, Turner, McKenzie, Engel, and Kendall,* 283

McNutt, Walter S., and **Snell, Esmond E.** Phosphates of pyridoxal and pyridoxamine as growth factors for lactic acid bacteria, 801

Meinke, W. W., and **Holland, Bryant R.** Threonine-serine antagonism in some lactic acid bacteria, 535
Miller, E. C. See *Price, Miller, and Miller,* 345
Miller, J. A. See *Price, Miller, and Miller,* 345
Moore, Dan H. See *Pillemer and Moore,* 427
Morse, Lura M. See *Tarver and Morse,* 53
Mulryan, B. See *Neuman, Fleming, Dounce, Carlson, O'Leary, and Mulryan,* 737

N

Nakamura, Kay, and **Binkley, Francis.** Colorimetric estimation of cysteine, 407
—. See *Binkley and Nakamura,* 411
Neuman, W. F., Fleming, R. W., Carlson, A. B., and **Glover, N.** The fluorophotometric determination of uranium in biological material, 41
—, **Fleming, R. W., Dounce, Alexander L., Carlson, A. B., O'Leary, J.,** and **Mulryan, B.** The distribution and excretion of injected uranium, 737
Nichol, C. A. See *Robblee, Nichol, Cravens, Elvehjem, and Halpin,* 117
Nickerson, Margaret. See *Jager and Nickerson,* 683
Norris, L. C. See *Daniel, Scott, Norris, and Heuser,* 123
Novikoff, Alex B., and **Potter, Van R.** Biochemical studies on regenerating liver, 223
— and —. Changes in nucleic acid concentration during the development of the chick embryo, 233
—, —, and **LePage, G. A.** Phosphorylating glycolysis in the early chick embryo, 239

O

O'Leary, J. See *Neuman, Fleming, Dounce, Carlson, O'Leary, and Mulryan,* 737
Ostwald, Rosemarie. Synthesis of chloroacetic acid and glycine labeled with radioactive carbon in the carboxyl group, 207

P

Paschkis, K. E. See *Pearlman, Rakoff, Paschkis, Cantarow, and Walkling,* 175
Pearlman, W. H., Rakoff, A. E., Paschkis, K. E., Cantarow, A., and **Walkling, A. A.** The metabolic fate of estrone in bile fistula dogs, 175
Peterson, W. H. See *Krueger and Peterson,* 497
Pillemer, Louis, and **Moore, Dan H.** The spontaneous conversion of crystalline tetanal toxin to a flocculating atoxic dimer, 427
Pope, Alfred, and **Anfinsen, Christian B.** Histochemical distribution of peptidase activity in the central nervous system of the rat, 305
Potter, Van R. See *Novikoff and Potter,* 223, 233
—. See *Novikoff, Potter, and LePage,* 239
Price, J. M., Miller, E. C., and **Miller, J. A.** The intracellular distribution of protein, nucleic acids, riboflavin, and protein-bound aminoazo dye in the livers of rats fed *p*-dimethylaminoazobenzene, 345
Price, Vincent E., and **Greenstein, Jesse P.** N-Acylated and N-methylated glycyldehydroalanine, 337
Putman, E. W., Hassid, W. Z., Krotkov, G., and **Barker, H. A.** Preparation of radioactive carbon-labeled sugars by photosynthesis, 785

R

Racker, E., and **Krimsky, I.** Inhibition of coupled phosphorylation in brain homogenates by ferrous sulfate, 519
Rakoff, A. E. See *Pearlman, Rakoff, Paschkis, Cantarow, and Walkling,* 175
Rhode, Clara Belle. See *Kety, Harmel, Broomell, and Rhode,* 487

Rice, Eugene W. See *Roe and Rice*, 507
Rittenberg, D. See *London, Shemin, and Rittenberg*, 797
—. See *Shemin, London, and Rittenberg*, 799
Robblee, A. R., Nichol, C. A., Cravens, W. W., Elvehjem, C. A., and **Halpin, J. G.** Some properties of an unidentified chick growth factor found in condensed fish solubles, 117
Roe, Joseph H., and **Rice, Eugene W.** A photometric method for the determination of free pentoses in animal tissues, 507
Ronzoni, Ethel. See *Velick and Ronzoni*, 627

INDEX TO SUBJECTS

A

Acetate: Uric acid ureide groups, synthesis, rôle, *Sonne, Buchanan, and Delluva*, 69

Acetic acid: Chloro-. *See* Chloroacetic acid

Adenine: Blood serum albumin, combination, *Klotz and Urquhart*, 21

Adenosine: Blood serum albumin, combination, *Klotz and Urquhart*, 21

Adenylic acid: Blood serum albumin, combination, *Klotz and Urquhart*, 21

Adipic acid: α-Amino-, arginine formation, relation, *Dubnoff and Borsook*, 425

—, lysine metabolism, relation, *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy*, 423

Adipose tissue: Fatty acid synthesis *in vitro*, *Shapiro and Wertheimer*, 725

Alanine: DL-, glycine, *Shankman*, 809

β-2-Furyl-, microbial growth, effect, *Clark and Dittmer*, 313

Glycyldehydro-, N-acylated and N-methylated, *Price and Greenstein*, 337

Naphthyl-, isomeric, synthesis and properties, *Dittmer, Herz, and Cristol*, 323

Albumin: Blood serum, adenine, adenosine, and adenylic acid, combination, *Klotz and Urquhart*, 21

Aldehyde(s): Fatty, higher, fuchsin reaction, surface-active substances, effect, *Ehrlich, Taylor, and Waelsch*, 547

Aldolase: Amino acids, *Velick and Ronzoni*, 627

Crystalline, *Taylor, Green, and Cori*, 591

Determination, *Dounce and Beyer*, 159

Amino acid(s): Aldolase, *Velick and Ronzoni*, 627

D-Glyceraldehyde phosphate dehydrogenase, *Velick and Ronzoni*, 627

Methionine, sulfur-labeled, tissue, *Friedberg, Tarver, and Greenberg*, 355

Aminoadipic acid: α-, arginine formation, relation, *Dubnoff and Borsook*, 425

—, lysine metabolism, relation, *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy*, 423

Aminoazo dye: Protein-bound, *p*-dimethylaminoazobenzene effect, *Price, Miller, and Miller*, 345

Aminosalicylic acid: *p*-, metabolism, *Venkataraman, Venkataraman, and Lewis*, 641

Amylase: β-, crystalline, sweet potato, *Balls, Walden, and Thompson*, 9

Anemia: Sickle cell, blood cell, red, heme synthesis *in vitro*, *London, Shemin, and Rittenberg*, 797

Anemonin: Proto-, pyruvic oxidase, effect, *Baer*, 211

Annelid(s): Marine, body fluid glucose, *Wilber*, 141

Apparatus: Photofluorometer, micro, *Lowry*, 677

Arginase: Protein denaturants, effect, *Hunter and Downs*, 31

Arginine: Formation, α-aminoadipic acid relation, *Dubnoff and Borsook*, 425

Avidin: Oleic acid, interaction, *Broquist and Snell*, 435

B

Bacteria: Lactic acid, growth, pyridoxal and pyridoxamine phosphates, effect, *McNutt and Snell*, 801

— —, peptide utilization, *Krehl and Fruton*, 479

— —, threonine-serine antagonism, *Meinke and Holland*, 535

See also Diplococcus, Staphylococcus

Bile: Fistula, estrone metabolism, effect, *Pearlman, Rakoff, Paschkis, Cantarow, and Walkling,* 175

Bile acid(s): Derivatives, stereochemical configuration, *Mattox, Turner, McKenzie, Engel, and Kendall,* 283

Steroids, *McKenzie, Mattox, Engel, and Kendall,* 271

Mattox, Turner, McKenzie, Engel, and Kendall, 283

Biotin(s): α- and β-, identity, *Krueger and Peterson,* 497

Blood: β-Glucuronidase, determination, *Fishman, Springer, and Brunetti,* 449

Hydrogen ion concentration, temperature effect, *in vitro, Rosenthal,* 25

Nitrous oxide solubility, *Kety, Harmel, Broomell, and Rhode,* 487

Blood cell(s): Red, heme synthesis *in vitro,* sickle cell anemia, *London, Shemin, and Rittenberg,* 797

—, nucleated, heme synthesis *in vitro,* glycine relation, *Shemin, London, and Rittenberg,* 799

Blood plasma: Hydrogen ion concentration, temperature effect, *in vitro, Rosenthal,* 25

Lipides, choline and cystine deficiency, thyroid effect, *Handler,* 295

Blood serum: Albumin, adenine, adenosine, and adenylic acid, combination, *Klotz and Urquhart,* 21

α-Globulin determination, chemical, *Jager and Nickerson,* 683

Brain: Nitrous oxide solubility, *Kety, Harmel, Broomell, and Rhode,* 487

Phosphorylation, coupled, ferrous sulfate effect, *Racker and Krimsky,* 519

C

Carbon: Radioactive, carboxyl group, chloroacetic acid and glycine synthesis, use, *Ostwald,* 207

—, glycine, liver protein, growth relation, *Friedberg, Schulman, and Greenberg,* 437

—, —, metabolism, use in study, *Greenberg and Winnick,* 199

Carbon—*continued:*

Radioactive, methyl group, sodium acetate, preparation, *Tolbert,* 205

—, protein metabolism, use in study, *Winnick, Friedberg, and Greenberg,* 189

Greenberg and Winnick, 199

—, sugars labeled with, preparation by photosynthesis, *Putman, Hassid, Krotkov, and Barker,* 785

—, tracer, *in vivo,* techniques, *Skipper, Bryan, White, and Hutchison,* 371

—, DL-tyrosine metabolism, use in study, *Winnick, Friedberg, and Greenberg,* 189

Carbon dioxide: Uric acid carbon chain and nitrogen atom 7, precursor, *Buchanan, Sonne, and Delluva,* 81

Carboxypeptidase: γ-Glutamic acid, chicken, specificity, *Kazenko and Laskowski,* 217

Central nervous system: Peptidase, *Pope and Anfinsen,* 305

Chick: Growth factor, fish solubles, properties, *Robblee, Nichol, Cravens, Elvehjem, and Halpin,* 117

—, pterins, synthetic, effect, *Daniel, Scott, Norris, and Heuser,* 123

Hemoglobin formation, pterins, synthetic, effect, *Daniel, Scott, Norris, and Heuser,* 123

Chicken: Pancreas conjugase specificity, *Kazenko and Laskowski,* 217

Chloride(s): Ion, colorimetric reaction, *Binkley,* 403

Chloroacetic acid: Synthesis, radioactive carbon in carboxyl group, use, *Ostwald,* 207

Cholenate: Methyl 3,9-epoxy-Δ^{11}-, synthesis from desoxycholic acid, *McKenzie, Mattox, Engel, and Kendall,* 271

Cholic acid: Desoxy-, methyl 3,9-epoxy-Δ^{11}-cholenate synthesis from, *McKenzie, Mattox, Engel, and Kendall,* 271

Choline: Deficiency, blood plasma lipides, thyroid effect, *Handler,* 295

—, liver lipides, thyroid effect, *Handler,* 295

Chymotrypsin: B, crystalline, *Brown, Shupe, and Laskowski,* 99
—, specificity, *Fruton,* 109
Conjugase: Pancreas, chicken, specificity, *Kazenko and Laskowski,* 217
Counter-current: Extractions, distribution calculations and partition coefficients, *Lieberman,* 63
Cozymase: Liver estrogen-inactivating system, rôle, *Coppedge, Segaloff, Sarett, and Altschul,* 431
Creatine: Synthesis, methyltestosterone effect, *Hoberman, Sims, and Engstrom,* 111
Cyanogen bromide: Thiamine reaction, relation, *Teeri,* 503
Cystathionine: Synthesis, *Stekol,* 153
Cysteine: Determination, colorimetric, *Nakamura and Binkley,* 407
Homo-. *See* Homocysteine
Mercaptals and mercaptoles, *Armstrong and du Vigneaud,* 749
Cystine: Deficiency, blood plasma lipides, thyroid effect, *Handler,* 295
—, liver lipides, thyroid effect, *Handler,* 295
Cytochrome: Oxidase, soluble, preparation, *Wainio, Cooperstein, Kollen, and Eichel,* 145

D

Dehydrogenase: D-Glyceraldehyde phosphate, amino acids, *Velick and Ronzoni,* 627
D-Glyceraldehyde-3-phosphate, crystalline, muscle, *Cori, Slein, and Cori,* 605
—, —, prosthetic group, *Taylor, Velick, Cori, Cori, and Slein,* 619
Desoxycholic acid: Methyl 3,9-epoxy-Δ^{11}-cholenate synthesis from, *McKenzie, Mattox, Engel, and Kendall,* 271
Desoxypentosenucleic acid: Polymerized, yeast, isolation, *Chargaff and Zamenhof,* 327
Dimethylaminoazobenzene: *p*-, liver protein, nucleic acids, riboflavin, and protein-bound aminoazo dye, effect, *Price, Miller, and Miller,* 345
Dipeptidase(s): Glycylglycine, muscle, *Smith,* 571
—, uterus, *Smith,* 571
Diphosphopyridine: Nucleotide, testosterone metabolism, liver, relation, *Sweat and Samuels,* 433
Diplococcus glycinophilus: Glycine fermentation mechanism, tracer use in, *Barker, Volcani, and Cardon,* 803
Distribution: Calculations, counter-current extractions, *Lieberman,* 63
Dye: Aminoazo-, protein-bound, *p*-dimethylaminoazobenzene effect, *Price, Miller, and Miller,* 345

E

Embryo: Chick, glycolysis, phosphorylating, *Novikoff, Potter, and LePage,* 239
—, nucleic acid, *Novikoff and Potter,* 233
Enzyme(s): D-Methionine and L-methionine preparation from DL-methionine, use, *Dekker and Fruton,* 471
Paramecin, effect, *van Wagtendonk,* 691
Proteolytic, tissue, *Fruton, Smith, and Driscoll,* 457
See also Aldolase, Amylase, Arginase, Carboxypeptidase, Chymotrypsin, Conjugase, Cozymase, Dehydrogenase, Dipeptidase, Glucuronidase, Lysophospholipase, Oxidase, Peptidase
Erythrocyte: *See* Blood cell, red
Estrogen(s): Liver, system, cozymase rôle, *Coppedge, Segaloff, Sarett, and Altschul,* 431
Estrone: Metabolism, bile fistula effect, *Pearlman, Rakoff, Paschkis, Cantarow, and Walkling,* 175
Etiocholene-9-ol-3(α)-one-17: Synthesis, partial, *Sarett,* 185

F

Fat(s): *See also* Adipose tissue
Fatty acid(s): Oxidase complex, liver, *Lehninger and Kennedy,* 753

Fatty acid(s)—*continued:*
Synthesis, *in vitro*, adipose tissue, *Shapiro and Wertheimer*, 725
—, — —, insulin effect, *Bloch and Kramer*, 811
—, — —, pyruvate effect, *Bloch and Kramer*, 811
Ferrous sulfate: Brain phosphorylation, coupled, effect, *Racker and Krimsky*, 519
Fish: Solubles, chick growth factor, properties, *Robblee, Nichol, Cravens, Elvehjem, and Halpin*, 117
Formate: Uric acid ureide groups, synthesis, rôle, *Sonne, Buchanan, and Delluva*, 69
Fuchsin: Aldehydes, higher fatty, reaction, surface-active substances, effect, *Ehrlich, Taylor, and Waelsch*, 547
Furylalanine: β-2-, microbial growth, effect, *Clark and Dittmer*, 313

G

Globulin: α-, blood serum, determination, chemical, *Jager and Nickerson*, 683
Glucose: Assimilation, yeast, *Fales and Baumberger*, 1
Body fluid, annelids, marine, *Wilber*, 141
Glucuronidase: β-, blood, determination, *Fishman, Springer, and Brunetti*, 449
Glutamic acid: γ-, carboxypeptidase, chicken, specificity, *Kazenko and Laskowski*, 217
Glutamine: *Staphylococcus aureus* antimetabolite, *Grossowicz*, 729
Glutathione: Hydrolysis, tissue, *Binkley and Nakamura*, 411
Metabolism, *Binkley and Nakamura*, 411
Glyceraldehyde: D-, phosphate, dehydrogenase, amino acids, *Velick and Ronzoni*, 627
Glyceraldehyde-3-phosphate: D-, dehydrogenase, crystalline, muscle, *Cori, Slein, and Cori*, 605
—, —, —, prosthetic group, *Taylor, Velick, Cori, Cori, and Slein*, 619
Glycine: DL-Alanine, *Shankman*, 809
Blood cell, red, nucleated, heme synthesis *in vitro*, relation, *Shemin, London, and Rittenberg*, 799
Fermentation, *Diplococcus glycinophilus*, mechanism, tracer use in, *Barker, Volcani, and Cardon*, 803
Glycyl-. *See* Glycylglycine
Metabolism, radioactive carbon in study, *Greenberg and Winnick*, 199
Radioactive carbon-labeled, liver protein, growth relation, *Friedberg, Schulman, and Greenberg*, 437
Synthesis, radioactive carbon in carboxyl group, use, *Ostwald*, 207
Uric acid carbon chain and nitrogen atom 7, precursor, *Buchanan, Sonne, and Delluva*, 81
Yeast purines, precursor, *Abrams, Hammarsten, and Shemin*, 429
Glycolysis: Phosphorylating, chick embryo, *Novikoff, Potter, and LePage*, 239
Glycyldehydroalanine: N-Acylated, *Price and Greenstein*, 337
N-Methylated, *Price and Greenstein*, 337
Glycylglycine: Dipeptidases, muscle and uterus, *Smith*, 571
Growth: Chick, pterins, synthetic, effect, *Daniel, Scott, Norris, and Heuser*, 123
Factor, chick, fish solubles, properties, *Robblee, Nichol, Cravens, Elvehjem, and Halpin*, 117
Lactic acid bacteria, pyridoxal and pyridoxamine phosphates, effect, *McNutt and Snell*, 801
Liver protein, glycine-labeled radioactive carbon, use in study, *Friedberg, Schulman, and Greenberg*, 437
Microbial, β-2-furylalanine effect, *Clark and Dittmer*, 313

H

Heart: Peptidase, *Smith*, 553
Heme: Blood cell, red, nucleated, synthesis *in vitro*, glycine relation,

Heme—*continued:*
Shemin, London, and Rittenberg, 799
Blood cell, red, synthesis *in vitro*, sickle cell anemia, *London, Shemin, and Rittenberg,* 797
Hemoglobin: Formation, pterins, synthetic, chick, effect, *Daniel, Scott, Norris, and Heuser,* 123
Homocysteine: S-(β-Amino-β-carboxyethyl)-, synthesis, *Stekol,* 153
Homolanthionine: Synthesis, *Stekol,* 153
Hydrocarbon(s): Methyl-substituted, phthiocerane-related, synthesis and x-ray study, *Ställberg-Stenhagen and Stenhagen,* 383
Hydrogen ion concentration: Blood plasma, temperature effect, *in vitro, Rosenthal,* 25
—, temperature effect, *in vitro, Rosenthal,* 25

I

Insulin: Fatty acid synthesis *in vitro*, effect, *Bloch and Kramer,* 811
Iodine: Protein-bound, determination, *Barker,* 715

L

Lactate: Uric acid carbon chain and nitrogen atom 7, precursor, *Buchanan, Sonne, and Delluva,* 81
—— ureide groups, synthesis, rôle, *Sonne, Buchanan, and Delluva,* 69
Lactic acid: Bacteria, growth, pyridoxal and pyridoxamine phosphates, effect, *McNutt and Snell,* 801
—, peptide utilization, *Krehl and Fruton,* 479
—, threonine-serine antagonism, *Meinke and Holland,* 535
Lanthionine: Homo-, synthesis, *Stekol,* 153
Leucine: Determination, microbiological, medium, *Camien and Dunn,* 137
Lipase: Lysophospho-, *Penicillium notatum*, preparation and properties, *Fairbairn,* 705
Lipide(s): Blood plasma, choline and cystine deficiency, thyroid effect, *Handler,* 295
Liver, choline and cystine deficiency, thyroid effect, *Handler,* 295
Liver: Estrogen-inactivating system, cozymase rôle, *Coppedge, Segaloff, Sarett, and Altschul,* 431
Fatty acid oxidase complex, *Lehninger and Kennedy,* 753
Lipides, choline and cystine deficiency, thyroid effect, *Handler,* 295
Nucleic acids, distribution, *p*-dimethylaminoazobenzene effect, *Price, Miller, and Miller,* 345
Protein, distribution, *p*-dimethylaminoazobenzene effect, *Price, Miller, and Miller,* 345
—, glycine-labeled radioactive carbon in, growth relation, *Friedberg, Schulman, and Greenberg,* 437
Protein-bound aminoazo dye, distribution, *p*-dimethylaminoazobenzene effect, *Price, Miller, and Miller,* 345
Regenerating, biochemistry, *Novikoff and Potter,* 223
Riboflavin, distribution, *p*-dimethylaminoazobenzene effect, *Price, Miller, and Miller,* 345
Testosterone metabolism, diphosphopyridine nucleotide relation, *Sweat and Samuels,* 433
Lysine: Metabolism, α-aminoadipic acid relation, *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy,* 423
Lysophospholipase: *Penicillium notatum*, preparation and properties, *Fairbairn,* 705

M

Mammary gland: Selenium, sodium selenate injection, effect, *McConnell,* 653
Methionine: D-, preparation from DL-methionine, enzyme use, *Dekker and Fruton,* 471
L-, preparation from DL-methionine, enzyme use, *Dekker and Fruton,* 471

Methionine—*continued:*
Labeled, tissue sulfur release, use in study, *Tarver and Morse*, 53
Sulfur-labeled, tissue protein and amino acid, injection effect, *Friedberg, Tarver, and Greenberg*, 355
Methyl 3,9-epoxy-Δ^{11}-cholenate: Synthesis from desoxycholic acid, *McKenzie, Mattox, Engel, and Kendall*, 271
Methylnicotinamide: N^1-, nicotinic acid, isotopic, relation, *Hundley and Bond*, 513
Methyltestosterone: Creatine synthesis, effect, *Hoberman, Sims, and Engstrom*, 111
Microorganism: Growth, β-2-furylalanine effect, *Clark and Dittmer*, 313
Milk: Proteins, selenium, sodium selenate injection, effect, *McConnell*, 653
Muscle: D-Glyceraldehyde-3-phosphate dehydrogenase, crystalline, *Cori, Slein, and Cori*, 605
Glycylglycine dipeptidase, *Smith*, 571
Peptidase, *Smith*, 553
See also Heart

N

Naphthylalanine: Isomeric, synthesis and properties, *Dittmer, Herz, and Cristol*, 323
Nicotinamide: N^1-Methyl-, nicotinic acid, isotopic, relation, *Hundley and Bond*, 513
Nicotinic acid: Isotopic, N^1-methylnicotinamide, relation, *Hundley and Bond*, 513
Tryptophan, pyridoxine, and, interrelations, *Spector*, 659
Nitrous oxide: Blood, solubility, *Kety, Harmel, Broomell, and Rhode*, 487
Brain, solubility, *Kety, Harmel, Broomell, and Rhode*, 487
Nucleic acid(s): Chick embryo, *Novikoff and Potter*, 233
Desoxypentose-. *See* Desoxypentosenucleic acid
Liver, *p*-dimethylaminoazobenzene effect, *Price, Miller, and Miller*, 345
Nucleotide: Diphosphopyridine, testosterone metabolism, liver, relation, *Sweat and Samuels*, 433

O

Octanoic acid: *n*-, determination, *Lehninger and Smith*, 773
Oleic acid: Avidin, interaction, *Broquist and Snell*, 435
Oxidase: Cytochrome, soluble, preparation, *Wainio, Cooperstein, Kollen, and Eichel*, 145
Fatty acid complex, liver, *Lehninger and Kennedy*, 753
Pyruvic, protoanemonin effect, *Baer*, 211
Oxidation: Phosphorylation and, coupling, *Loomis and Lipmann*, 807

P

Pancreas: Conjugase, chicken, specificity, *Kazenko and Laskowski*, 217
Pantothenic acid: Pyruvate metabolism by *Proteus morganii*, rôle, *McElroy and Dorfman*, 805
Paramecin: Enzyme action, *van Wagtendonk*, 691
Partition coefficients: Counter-current extractions, *Lieberman*, 63
Penicillium notatum: Lysophospholipase, preparation and properties, *Fairbairn*, 705
Pentose(s): Free, tissue, determination, photometric, *Roe and Rice*, 507
Peptidase: Carboxy-, γ-glutamic acid, chicken, specificity, *Kazenko and Laskowski*, 217
Central nervous system, *Pope and Anfinsen*, 305
Di-. *See* Dipeptidase
Heart, *Smith*, 553
Muscle, *Smith*, 553
Thymus, *Fruton, Smith, and Driscoll*, 457
Uterus, *Smith*, 553
Peptide(s): Lactic acid bacteria, utilization, *Krehl and Fruton*, 479
Phosphorylation: Coupled, brain, ferrous sulfate effect, *Racker and Krimsky*, 519

Phosphorylation—*continued:*
Oxidation and, coupling, *Loomis and Lipmann*, 807
Photofluorometer: Micro, *Lowry*, 677
Photosynthesis: Sugars, radioactive carbon-labeled, use in preparation, *Putman, Hassid, Krotkov, and Barker*, 785
Phthiocerane: Hydrocarbons, methyl-substituted, long chain, synthesis and x-ray study, *Ställberg-Stenhagen and Stenhagen*, 383
Potato: Sweet, β-amylase, crystalline, *Balls, Walden, and Thompson*, 9
Protein(s): B, crystalline, activated, *Brown, Shupe, and Laskowski*, 99
-Bound aminoazo dye, liver, distribution, *p*-dimethylaminoazobenzene effect, *Price, Miller, and Miller*, 345
— iodine, determination, *Barker*, 715
Denaturants, arginase, effect, *Hunter and Downs*, 31
Liver, distribution, *p*-dimethylaminoazobenzene effect, *Price, Miller, and Miller*, 345
—, glycine-labeled radioactive carbon in, growth relation, *Friedberg, Schulman, and Greenberg*, 437
Metabolism, radioactive carbon in study, *Winnick, Friedberg, and Greenberg*, 189
Greenberg and Winnick, 199
Methionine, sulfur-labeled, tissue *Friedberg, Tarver, and Greenberg*, 355
Milk, selenium, sodium selenate injection, effect, *McConnell*, 653
Proteolysis: Enzymes, tissue, *Fruton, Smith, and Driscoll*, 457
Proteus morganii: Pyruvate metabolism by, pantothenic acid rôle, *McElroy and Dorfman*, 805
Protoanemonin: Pyruvic oxidase, effect, *Baer*, 211
Pterin(s): Synthetic, growth, chick, effect, *Daniel, Scott, Norris, and Heuser*, 123
—, hemoglobin formation, chick, effect, *Daniel, Scott, Norris, and Heuser*, 123
Purine(s): Characterization, countercurrent distribution, *Tinker and Brown*, 585
Yeast, glycine as precursor, *Abrams, Hammarsten, and Shemin*, 429
Pyridine: Diphospho-. *See* Diphosphopyridine
Pyridoxal: Phosphate, lactic acid bacteria, growth effect, *McNutt and Snell*, 801
Pyridoxamine: Phosphate, lactic acid bacteria, growth effect, *McNutt and Snell*, 801
Pyridoxine: Tryptophan, nicotinic acid, and, interrelations, *Spector*, 659
Pyrimidine(s): Characterization, counter-current distribution, *Tinker and Brown*, 585
Pyruvate: Fatty acid synthesis *in vitro*, effect, *Bloch and Kramer*, 811
Metabolism by *Proteus morganii*, pantothenic acid rôle, *McElroy and Dorfman*, 805
Pyruvic oxidase: Protoanemonin effect, *Baer*, 211

R

Riboflavin: Liver, *p*-dimethylaminoazobenzene effect, *Price, Miller, and Miller*, 345

S

Salicylic acid: *p*-Amino-, metabolism, *Venkataraman, Venkataraman, and Lewis*, 641
Selenium: Mammary gland, sodium selenate injection, effect, *McConnell*, 653
Milk proteins, sodium selenate injection, effect, *McConnell*, 653
Serine: Threonine-, antagonism, lactic acid bacteria, *Meinke and Holland*, 535
Sodium acetate: Radioactive carbon in methyl group, preparation, *Tolbert*, 205
Sodium selenate: Mammary gland and milk protein selenium, injection effect, *McConnell*, 653
Staphylococcus aureus: Glutamine, antimetabolite, *Grossowicz*, 729

Steroid(s): Bile acids, *McKenzie, Mattox, Engel, and Kendall,* 271
Mattox, Turner, McKenzie, Engel, and Kendall, 283
Sugar(s): Radioactive carbon-labeled, preparation by photosynthesis, *Putman, Hassid, Krotkov, and Barker,* 785
Sulfur: -Labeled methionine, tissue protein and amino acid, injection effect, *Friedberg, Tarver, and Greenberg,* 355
Tissue, release, labeled methionine use in study, *Tarver and Morse,* 53
Sweet potato: *See* Potato

T

Testosterone: Metabolism, liver, diphosphopyridine nucleotide relation, *Sweat and Samuels,* 433
Methyl-, creatine synthesis, effect, *Hoberman, Sims, and Engstrom,* 111
Tetanus: Toxin, crystalline, atoxic dimer, conversion, *Pillemer and Moore,* 427
Thiamine: Cyanogen bromide reaction, relation, *Teeri,* 503
Threonine: -Serine antagonism, lactic acid bacteria, *Meinke and Holland,* 535
Thromboplastic effect: Inhibition, *Chargaff and Green,* 263
Mechanism, *Chargaff,* 253
Thymus: Peptidase, *Fruton, Smith, and Driscoll,* 457
Thyroid: Blood plasma lipides, choline and cystine deficiency, effect, *Handler,* 295
Liver lipides, choline and cystine deficiency, effect, *Handler,* 295
Tocopherol(s): Related structures and, absorption spectra, *Rosenkrantz,* 439
Toxin: Tetanus, crystalline, atoxic dimer, conversion, *Pillemer and Moore,* 427
Trypsin: Chymo-, B, crystalline, *Brown, Shupe, and Laskowski,* 99
—, —, specificity, *Fruton,* 109
Tryptophan: Pyridoxine, nicotinic acid, and, interrelations, *Spector,* 659
Tumor: DL-Tyrosine metabolism, radioactive carbon in study, *Winnick, Friedberg, and Greenberg,* 189
Tyrosine: DL-, metabolism, tumor, radioactive carbon in study, *Winnick, Friedberg, and Greenberg,* 189

U

Uranium: Biological material, determination, fluorophotometric, *Neuman, Fleming, Carlson, and Glover,* 41
Distribution and excretion, injection effect, *Neuman, Fleming, Dounce, Carlson, O'Leary, and Mulryan,* 737
Uric acid: Biological precursors, *Sonne, Buchanan, and Delluva,* 69
Buchanan, Sonne, and Delluva, 81
Carbon chain, lactate, glycine, and carbon dioxide as precursors, *Buchanan, Sonne, and Delluva,* 81
Nitrogen atom 7, lactate, glycine, and carbon dioxide as precursors, *Buchanan, Sonne, and Delluva,* 81
Ureide groups, synthesis, lactate, acetate, and formate, rôle, *Sonne, Buchanan, and Delluva,* 69
Uterus: Glycylglycine dipeptidase, *Smith,* 571
Peptidase, *Smith,* 553

V
